To Whom It May Concern

This is to certify that Mr. Jinit Shah completed a one month-long internship at Finpeg between 20th May 2019 and 20th June 2019.

During the course of the internship, Jinit worked closely with me and helped me out in a wide range of financial analysis such as assessing the long term performance of various mutual funds in India and around the world and benchmarking the same against their respective indices, creating visualization of data for better understanding of market trends, and refining our investment strategies based on conclusions drawn from his analysis. He also helped build an automated system to download historical data, calculates returns and update the data every day. During the course of his internship, Jinit demonstrated strong acumen in the following areas:

- Python Programming
- Analysis using Pandas library
- Data visualization using Matplotlib library
- Web Automation using Selenium

Jinit showed great aptitude with respect to learning and understanding fairly complex financial concepts that were beyond his core area of expertise, and complemented this newly acquired understanding with his core skills in programming to deliver highly effective solutions for Finpeg.

Overall, Jinit's performance during the internship was very good. I would highly recommend him for any project / internship / job that involves analysis and processing of complex financial data. I wish him all the very best for all his future endeavors.

Yours Sincerely
